## Experience

ATOM

### Product Designer

2024 — Now

- Redesigned the information architecture of the vehicle infotainment system Settings module: improved navigation, search, and user flows, consolidating 100+ vehicle and system settings into a scalable structure.
- Designed UX/UI for core HMI experiences, including home screen, widgets, notifications, climate controls, applications, and instrument cluster interfaces. Delivered interactive prototypes and product concepts for stakeholder alignment and presentations.
- Established a structured design-to-development handoff process: organized design artifacts, mapped user scenarios to SRS requirements, prepared release batches, and created documentation for engineering and business analysis teams.
- Led UX research activities, design reviews, and cross-functional workshops, shaping product concepts and advocating design decisions across product, research, and platform teams.

Individual entrepreneur

### Product Designer

2024 — Now

- [Load Nova](#) AI-powered platform for automating dispatcher workflows in the U.S. freight industry. Owned the full product design cycle, including user research, UX/UI design, hypothesis generation and validation, design system development, and collaboration with engineering teams. Designed workflows that reduced manual operations and context switching between tools, helping dispatchers make faster decisions and manage freight operations more efficiently.
- [Push App](#) Designed a travel expense tracking mobile app from scratch: defined the product vision, created the end-to-end user experience, and optimized the core expense entry flow to 2–3 actions, reducing task completion time by approximately 50%.

Avito App

### Senior Product Designer

Feb 2023 — Jul 2023

- Developed and validated product hypotheses for the automotive marketplace domain: designed user flows, created interactive prototypes, and shaped product concepts through research and validation before development handoff.

Alfa Bank Web

## Product Designer

Jul 2021— June 2022

- Implemented a financial risk indicator across the user dashboard and integrated it into multiple product touchpoints, helping users identify potential financial issues earlier and make more informed decisions.
- Redesigned counterparty reports, increasing engagement with the service. Created a fully digital deposit opening flow, contributing to customer acquisition growth and improving the onboarding experience.

AIC Studio Web / Web App / iOS

## Designer

Aug 2019— Jul 2021

- Worked on digital product initiatives for top-5 IT companies in Russia, delivering UX/UI solutions across enterprise and consumer products.
- Redesigned a marketplace platform for a telecommunications company, increasing add-to-cart rate by 14% and improving conversion rate by 1.8% through UX improvements.
- Designed an ERP system for a manufacturing facility producing custom optical lenses, including complex product configuration workflows and parameter-based order management.

## Education

Moscow Polytechnic University

### B.Sc. in Computer-Aided Design (CAD)

## Mentorship

### Bang Bang Education

2023—2025

Mentored a group of 20 students in a UX/UI Design course, supporting their learning process through feedback sessions, design reviews, and personalized guidance. Achieved a 70% course completion rate, with 90% of students consistently submitting assignments on time and reporting a high level of mentor engagement. Developed custom educational materials and practical exercises tailored to students' needs and learning progress.

## Languages

English: upper intermediate

Russian: native

## Skills

- Technical Skills: AI, Sketch, Figma, Adobe Creative Suite, InVision, HTML/CSS, JavaScript, Front End Coding, Jira, Slack,
- Design Skills: UI/UX Design, Interaction Design, User Research, Prototyping, Wireframing, Visual Design
- Soft Skills: Collaboration, Communication, Problem-Solving, Time Management, Attention to Detail, Autonomy, Listening, Focused,
